PROJECTS

Movie Recommender System | *Python, Pandas, Scikit-learn, Streamlit*

July 2025

- Developed a content-based recommendation engine to suggest movies based on plot summaries, genres, and cast.
- Engineered features from the TMDB dataset using Pandas for data cleaning and transformation.
- Implemented a vector space model with Scikit-learn to calculate similarity using cosine distance.
- Deployed the model as a Streamlit web app for real-time recommendations.

Job Portal Website | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*

May 2025 – June 2025

- Developed a full-stack job portal connecting job seekers and employers through an intuitive interface.
- Designed responsive front-end components using React.js and CSS.
- Built RESTful APIs with Node.js and Express.js for authentication and job management.
- Integrated MongoDB for efficient storage and retrieval of profiles and listings.
- Enhanced scalability through optimized backend architecture.

Quick GPT | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*

Oct 2025

- Developed an AI-powered chatbot using OpenAI API for real-time conversational interaction.
- Built front-end with React.js and backend services using Node.js and Express.js.
- Implemented MongoDB for user data storage and chat history management.
- Designed a responsive UI with dark/light mode and chat animations.
- Optimized API calls and state management to improve response time.
