PROJECTS

AI Therapist (Conversational Mental Health Assistant) | *Python, LangChain, LLMs, Vector DB* 

- Developed an AI-powered conversational assistant using LangChain, LLMs, and Vector Databases for context-aware interactions.
- Implemented prompt engineering, conversation memory, and semantic search to improve response quality.
- Implemented vector database storage for maintaining conversation history and enabling personalized interactions.
- Integrated scalable backend workflows and optimized retrieval for efficient conversation management.

HireHub (Job Portal) | *MERN Stack (MongoDB, Express.js, React.js, Node.js)* 

- Developed a full-stack job portal using the MERN Stack with secure JWT authentication and RESTful APIs.
- Built responsive React interfaces and scalable backend services following MVC architecture and modern software engineering practices.
- Implemented CRUD operations, input validation, and database optimization using MongoDB, Git, and Postman.

StockSense Pro (Stock Analysis Platform) | *Python, FastAPI, React, FinBERT, Supabase* 

- Developed a full-stack stock analysis platform with FastAPI backend and React frontend, integrating REST APIs for market and news data.
- Implemented REST API endpoints for stock prediction, health checks, and data processing.
- Integrated FinBERT-based sentiment analysis with financial news and market data to generate stock insights.
