Tools & DevOps: Linux, Docker, Kubernetes, Apache Kafka, CI/CD, Postman, Git, GitHub, Postman, Streamlit, Vercel

Projects

AI Therapist (Conversational Mental Health Assistant) | ***Python, LangChain, LLMs, Vector DB***

- Developed an AI-powered conversational assistant using LangChain, LLMs, and Vector Databases for context-aware interactions.
- Implemented prompt engineering, conversation memory, and semantic search to improve response quality.
- Implemented vector database storage for maintaining conversation history and enabling personalized interactions.
- Integrated scalable backend workflows and optimized retrieval for efficient conversation management.

HireHub (Job Portal) | ***MERN Stack (MongoDB, Express.js, React.js, Node.js)***

- Developed a full-stack job portal using the MERN Stack with secure JWT authentication and RESTful APIs.
- Built responsive React interfaces and scalable backend services following MVC architecture and modern software engineering practices.
- Implemented CRUD operations, input validation, and database optimization using MongoDB, Git, and Postman.

ContractLens (AI Contract Analysis) | ***Python, FastAPI, React, Gemini, RAG, MCP***

- Developed an AI-powered contract analysis platform to extract key clauses, summarize agreements, and identify potential risks.
- Implemented RAG-based question answering using Gemini embeddings and semantic search with document-grounded citations.
- Integrated MCP-based web search for external legal research and source-backed insights.
